

20 TPD Oilseed Pressing Machine

The 20 TPD oilseed pressing machine is designed for continuous oil extraction from various oilseeds. This machine ensures high oil yield and minimal residual oil in the cake.

Overview

High-Efficiency Oil Extraction

This 20 TPD oilseed pressing machine is engineered for continuous operation in medium-scale oil processing facilities. It features a robust screw press mechanism designed to handle a diverse range of oilseeds with high efficiency and superior oil yield. Built with durable alloy steel components, this unit ensures longevity and reliable performance for demanding industrial environments.

Performance Specifications

Daily Processing Capacity

20 TPD
Capacity

Compatible Oilseeds

Peanut, Sunflower, Soybean, Sesame, Rapeseed, Canola, Mustard, Cotton seed, Black seed, Animal fat

Design & Construction

Key Features

- Long press cage design
- High oil yield efficiency
- Integrated control panel
- Overload protection
- Emergency stop mechanism

Construction Material

Alloy steel for wearing parts
