Product Overview

Professional 200-Channel UHF Wireless System

The UH-16Pro is a high-performance diversity wireless microphone system designed for stable, long-range audio transmission up to 70 meters. Featuring a robust metal receiver housing with an elegant silver panel, it offers 200 selectable frequencies and auto-scanning technology to ensure interference-free operation. This versatile system supports both professional XLR outputs and convenient 5V USB power, making it ideal for both fixed installations and portable outdoor use.

Key Performance Metrics

Key Performance Metrics

200 CH

Total Channels

70 m

Operating Distance

5 V

USB Power Input

Wireless Technology

Reception System

Antenna Diversity • UHF Band

Frequency Range	480~960MHz (Region dependent)
Channel Configuration	2x100 multi-frequency settings
Synchronization Mode	Infrared (IR) Synchronizing

Smart Features

Detailed view of the receiver interface including LCD display, IR sync, and connectivity options.

Advanced Functions

- Auto-scanning for best working frequency
- Bluetooth 4.1 for smartphone app connectivity
- Infrared pairing between receiver and transmitter
- Real-time AF & RF signal monitoring

Hardware & Connectivity

Power Supply Options

- 5V 1000mA Power Adapter
- 5V USB Input (Power Bank compatible)

Construction

Metal receiver housing with aluminum handheld components

Audio Outputs

2x XLR Balanced, 1x Mixed Output

User Interface

Display System

LCD display for channel, frequency, and status monitoring

Integrated Controls

Volume A/B, Auto Scan, Sync, Power On/Off
