Product Overview

Industrial Semi-Electric Stacker

This semi-electric stacker is a professional material handling solution designed for efficient lifting and transportation of palletized loads in warehouses and industrial settings. It combines the reliability of a robust steel frame with an electric lifting mechanism for smooth vertical movement and manual propulsion for precise positioning. Compact and durable, it provides a cost-effective way to optimize storage space and enhance operational safety.

Performance Specifications

Rated Lifting Capacity

2000 kg

Max Load Capacity

Operation Mode

Manual Propulsion, Electric Lift

Design and Build

Build Quality

Robust steel frame construction

Wheel Material

Polyurethane

Fork Configuration

Yes

Safety and Features

Safety Features

- Overload protection
- Emergency stop button
- Hand-operated parking brake
