

# 2000A Automatic Transfer Switch with Digital Display

This automatic transfer switch is designed for seamless transfer switching applications. It features a digital display for real-time monitoring and push-button controls for manual operation.

## Overview

### High-Capacity Automatic Transfer Switch

This 2000A automatic transfer switch is engineered for reliable power management in critical electrical systems. It features an integrated digital display for precise real-time monitoring and intuitive push-button controls for both manual and automatic operation. Designed for seamless integration, this unit ensures robust performance and safety in high-load applications.

## Technical Specifications

### Rated Current

**2000 A**

Rated Current

### Breaking Capacity

10 kA

### Number of Poles

3

## Features

### Interface & Control

- Digital display for real-time monitoring
- Push-button controls for manual On/Off operation
- Integrated terminal connections for system integration

### Device Type

Air Circuit Breaker • Automatic Transfer Switch
