

# 2000m Trailer-Mounted Drilling Rig

This trailer-mounted drilling rig has collectively installed power, transmission, control, and lifting systems on a special semi-trailer chassis. Its mechanical transmission is reliable for the rotary table and drawworks, ensuring convenient maintenance.

## Overview

### High-Mobility Drilling Solution

This 2000m trailer-mounted drilling rig is engineered for efficient petroleum prospecting and conventional drilling operations. Designed for the petrochemical industry, it features a heavy-duty chassis and integrated systems that ensure reliable performance in demanding field environments. The trailer-mounted configuration allows for rapid deployment and ease of transportation between drilling sites, significantly enhancing operational flexibility.

## Performance Specifications

### Maximum Drilling Depth

**2000 m**

Depth

## Design & Mobility

### Safety Features

High-Visibility Color Scheme • Robust Structure

### Mounting Type

Trailer-Mounted

### Primary Applications

Petroleum Prospecting, Conventional Drilling, Petrochemical Engineering
