

2000W Electric Heat Gun with Adjustable Temperature

This 2000W electric heat gun is designed for applications requiring controlled hot air. It features adjustable temperature settings, allowing for precise heat control for tasks such as paint stripping and heat shrinking.

ADDITIONAL IMAGES

Overview

The PLD2233 features an integrated LCD display for precise temperature control during operation.

Professional Performance

The PLD2233 is a versatile 2000W electric heat gun designed for professional applications ranging from paint stripping and varnish removal to shrinking wire wraps and thawing pipes. It features advanced constant heat control and an LCD digital display for precise operation. With its ergonomic soft-grip design and intelligent memory settings, this tool provides both comfort and efficiency for demanding work environments.

Technical Specifications

Power Rating	2000 W
Voltage	220-240V
Frequency	50 Hz

Performance Metrics

Temperature Range

50 °C

Setting I

650 °C

Setting II (Max)

Air Flow

250-500 L/M

Features

Designed for professional use, the tool incorporates a soft-grip handle for extended, fatigue-free operation.

Key Features

- LCD Digital Display
- Continuous adjustable temperature
- Variable air flow control
- Constant Heat Control technology
- Over-heat protection
- Historical memory of last setting

Design & Ergonomics

Ergonomic handle, Soft grip, Effortless operation, Durable construction

Applications

Recommended Applications

- Stripping paint and varnish
- Removing decals
- Shrinking wire wraps
- Loosening fittings
- Thawing pipes
