Product Overview

Versatile Thermal Performance

This professional-grade 2000W electric heat gun is engineered for precision and reliability across a wide range of industrial and DIY tasks. It features dual-stage temperature settings, allowing operators to switch between 350°C and 550°C to suit specific material requirements. With a robust design and four included nozzles, this tool is ideal for paint stripping, heat shrinking, forming plastics, and thawing frozen components.

Technical Specifications

Input Power	2000 W
Voltage Compatibility	110-120V, 220-240V
Frequency	50/60Hz

Performance Metrics

Temperature Settings

350 °C Stage I	550 °C Stage II
