

2000W Electric Induction Cooktop

This electric induction cooktop provides efficient and versatile cooking with a maximum power of 2000W. It features multiple cooking functions and a wide voltage range for diverse cooking needs.

Product Overview

Professional Induction Cooking Solution

This 2000W electric induction cooktop is designed for versatility and energy efficiency in demanding kitchen environments. Featuring advanced ultra-low voltage start technology, it operates reliably across a wide 80V-280V range, making it suitable for unstable power grids. With precise temperature controls and multiple dedicated cooking modes, it offers professional-grade performance for stir-frying, boiling, and simmering.

Performance & Power

Cooking Performance

300 °C Max Temperature	23 hours Max Timer Setting
----------------------------------	--------------------------------------

Maximum Power	2000 W
Operating Voltage Range	80V - 280V

Features & Functionality

Cooking Functions

- Stir-frying
- Grilling
- Heating milk
- Boiling water
- Cooking rice
- Soup/Porridge
- Hot pot

Smart Features	Ultra-low voltage start, Smart energy eye, Voltage display, Energy consumption display, Five-stage firepower control
----------------	--

Design & Build

Finish	Titanium-gold automotive paint
Display	Four-digit digital display
