

2000W Electric Induction Cooktop

This electric induction cooktop provides efficient and rapid heating for a variety of cooking needs. It features multiple cooking functions, a timer, and a wide voltage range for versatile use.

Overview

Professional Induction Cooking Performance

This high-performance 2000W induction cooktop is designed for versatility and energy efficiency in demanding environments. Featuring advanced wide-voltage technology, it operates reliably between 80V and 280V, making it suitable for areas with unstable power grids. With seven distinct cooking modes and precision temperature control, it offers a professional-grade solution for stir-frying, boiling, and simmering.

Performance & Power

Maximum Power

2000 W
Max Power

Operating Voltage Range	80V - 280V
Temperature Control	30°C - 300°C (5-stage control)
Super Stir-fry Mode	300 °C

Features

Cooking Functions

- Stir-fry
- Barbecue
- Hot milk
- Boiling water
- Cooking rice
- Soup/Porridge
- Hot pot

Smart Features	Voltage Display, Energy Consumption Display, Timer (0-23 hours), Wide-voltage Start
----------------	---

Design

External Finish	Titanium alloy design with premium automotive paint
Display Type	Four-digit digital display
