

2000W Electric Induction Cooktop

This electric induction cooktop provides 2000W of power for efficient cooking. It features multiple cooking functions and a wide voltage range.

Overview

Professional Induction Cooking Solution

This high-performance induction cooktop is engineered for versatility and reliability in diverse electrical environments. Featuring advanced low-voltage start technology, it ensures stable operation even in areas with fluctuating power grids. With a wide operational voltage range and precise temperature control, it offers professional-grade cooking capabilities for a variety of culinary tasks.

Performance

Temperature Control

30 °C Min Temperature	300 °C Max Temperature
---------------------------------	----------------------------------

Maximum Power	2000 W
Operational Voltage Range	80V - 280V

Features

Cooking Functions

- Stir-frying
- Grilling
- Heating milk
- Boiling water
- Cooking rice
- Soup/Porridge
- Hot pot

Timer Range	0 - 23 hours
Smart Features	Intelligent Voltage Monitoring, Energy Consumption Display, Low-Voltage Start Technology

Design

Material Finish	Titanium alloy with automotive paint finish
Display	Four-digit digital display
