

2000W Heat Gun with EU Plug

This 2000W heat gun is equipped with an EU plug. It is designed for tasks such as removing paint, bending plastics, and shrinking heat shrink tubing.

Product Overview

Versatile Thermal Tooling

This 2000W heat gun is a professional-grade tool engineered for precision and versatility. Ideal for a wide range of applications, it excels at removing paint, bending plastics, shrinking heat shrink tubing, and thawing frozen pipes. Its ergonomic design ensures comfortable handling during prolonged use, making it a reliable asset for both professional workshops and demanding projects.
