

200A AC/DC TIG Welder with IGBT Inverter

This welding machine provides a stable power source for arc welding, specifically for TIG DC welding with HF or LIFT strike. It also supports MMA welding with coated electrodes, such as rutile, acid, and basic.

Product Overview

Professional-grade 200A IGBT inverter welder for multi-metal applications.

Professional TIG & MMA Inverter Welder

This high-performance 200A welding machine utilizes advanced IGBT inverter technology to provide stable and precise arc welding. Designed for versatility, it supports both TIG DC welding with HF or lift strike and MMA welding with various coated electrodes. It is an ideal tool for professionals working with carbon steel, stainless steel, and aluminum alloys.

Technical Specifications

Welding Range	200 A
Duty Cycle @ 40°C	60 %
Arc Starting	HF & Lift Strike
Max Power Capacity	7.1 kW
No Load Voltage	60 V
Input Voltage	220 V

Features & Capability

Key Features

- Portable Design
- Hot Start Function
- 2T/4T TIG Welding Modes

Materials Processed	Carbon Steel, Stainless Steel, Aluminium Alloy
---------------------	--

Physical Attributes

Weight	10.5 kg
Dimensions (cm)	49 x 25 x 35

Service & Compliance

Certifications	CE
Warranty Period	1 Year
