

200A Digital Display Inverter DC/MMA Welder

This is a compact and portable inverter DC/MMA welder designed for various welding applications. It features a digital display for precise current control and adjustable current settings.

Overview

Compact Inverter Welder

This portable inverter DC/MMA welder is designed for versatility and precision in various welding applications. Featuring a clear digital display for accurate current control, it allows users to easily adjust settings for different tasks. Built for both professional and DIY environments, this unit offers reliable performance and includes essential accessories for immediate use.

Performance Metrics

Output Current Range

20 A Min Current	160 A Max Current
----------------------------	-----------------------------

No-load Voltage	65 V
-----------------	------

Electrical Specifications

Input Voltage	110V, 220V
---------------	------------

Input Current	26.3 A
---------------	--------

Included Accessories

Included Equipment

Item	Length
Earth Clamp	1.2m
Welding Holder	1.8m

General Information

Welding Type

DC • MMA

Model Number	P813200A
