

200A Portable DC MMA Welding Machine

This portable welding machine is designed for MMA (Manual Metal Arc) welding. It features adjustable current control for precise welding and a digital display for monitoring output.

Product Overview

Portable DC MMA Welding Solution

This portable DC MMA welding machine is engineered for versatility and ease of use in various environments. Featuring a compact design with an integrated carrying handle, it is suitable for both professional and DIY welding tasks. The unit includes precise current control and essential safety features like an advanced cooling system to ensure reliability during extended operation.

Technical Specifications

Output Current Range

20 A Min Current	130 A Max Current
----------------------------	-----------------------------

Input Voltage	110V, 220V
Input Current	21.8 A
No-Load Voltage	65 V

Included Accessories

Cable Lengths

Component	Length
Earth Clamp	1.2m
Welding Holder	1.8m

Features

Key Features

- Portable design with carrying handle
- Adjustable current control
- Digital display for output monitoring
- Integrated cooling system
- Standard welding connectors
