Overview

Reliable Cold-Chain Logistics Solution

This 200CC gasoline-powered cargo tricycle is specifically engineered for the efficient transport of temperature-sensitive goods. Featuring a fully enclosed, insulated PU (polyurethane) cargo box, it ensures optimal freshness for perishable items during transit. With a robust 400kg load capacity and a stable three-wheel design, it offers a practical, maneuverable solution for urban and rural delivery operations.

Performance & Engine

Engine Performance

200 cc

Engine Displacement

400 kg

Load Capacity

Engine Details

- 1 Cylinder, 4-stroke
- Air cooled
- Electric/Kick starter system
- C.D.I Ignition

Cargo & Insulation

Cargo Box Specifications

- Insulated PU material for fresh keeping
- Dimensions: 2m x 1.2m x 1.2m
- Rear and side opening doors

Technical Specifications

Chassis & Suspension

Component	Specification
Chassis	40x80
Front Absorber	Dragon front shock, #43
Rear Suspension	Steel plates, 7+2 thickness

Transmission & Brakes

5 Forward + 1 Reverse Transmission, Front/Rear Drum Brakes, 5.00-12 Tyre Size

Electrical System

14 Ah
