Overview

Versatile Cargo Solution

The 200CC Motorized Cargo Tricycle is a heavy-duty utility vehicle engineered for reliable performance in agricultural and industrial environments. It features a reinforced cargo bed and a robust engine cooling system to ensure enduring operation under load. With a durable steel frame and high-capacity rear axle, this tricycle is built to withstand rigorous daily use while transporting goods across various terrains.

Technical Specifications

Engine Displacement	200 cc
Cooling System	Water Cooling, Auxiliary Tank

Cargo Bed Details

Cargo Bed Width	420 mm
Floor Plate Thickness	2 mm

Performance & Build

Key Features

- Reinforced cargo box construction
- Riffled floor plate for durability
- High-capacity fuel tank for extended range
- Entire floating rear axle design

Axle Specifications

70 mm Axle Tube Diameter	5 mm Axle Tube Thickness
