

200cc Street Motorcycle

This street motorcycle is equipped with a 200cc engine, providing a balance of power and fuel efficiency. It features modern styling, a digital instrument panel, and a comfortable riding position.

Overview

Modern Retro Street Performance

The 200cc Street Motorcycle is a retro-styled urban bike designed for riders who value both aesthetics and performance. Powered by an upgraded Generation II 200cc water-cooled NBF engine, it delivers a smooth and efficient riding experience suitable for daily commuting and recreational use. With its modern features like LED lighting, digital instrumentation, and adjustable suspension, this motorcycle blends classic styling with contemporary technology.
