

200kW Industrial Dynamo

This 200kW industrial dynamo is designed for power generation in heavy-duty applications. It provides a stable power output for demanding industrial environments.

Overview

High-Performance Industrial Dynamo

This 200kW industrial dynamo is engineered for reliable power generation in demanding environments. Built with high-quality materials including premium copper windings and specialized insulating components, it ensures consistent energy conversion and durability. Designed for heavy-duty applications, this unit provides a stable and dependable power source for manufacturing and large-scale operations.

Construction & Materials

Bearing Options

- Standard C&U
- Optional SKF
- Optional NSK

Winding Material

100% Copper

Insulation Components

German-standard insulating varnish, Austrian-standard insulating paper

Quality & Standards

Warranty Period

2 Years

Testing Capability

1500 kW

Logistics

Packaging

Standard export plywood case
