

200uF 250V AC Motor Start Capacitor

This is a CD60 motor starting capacitor with a capacitance of 200µF and a voltage rating of 250V AC. It is designed for 50/60Hz operation and has a temperature range of -40/+65°C.

Overview

High-Performance Motor Starting Capacitor

This CD60 motor starting capacitor is engineered to provide reliable performance for motor applications requiring a 200µF capacitance. Designed to operate effectively at 250V AC, it supports both 50Hz and 60Hz frequency standards. Its robust construction allows it to function within a wide temperature range of -40°C to +65°C, ensuring stability in diverse operating environments.

Technical Specifications

Capacitance	200 µF
Rated Voltage	250 V AC
Frequency	50/60Hz
Operating Temperature Range	-40 to +65°C

Certifications

Compliance & Standards	CE, CQC
