

# 200W LED High Bay Light

This LED high bay lighting fixture is designed for industrial and commercial applications. It provides efficient and uniform illumination while consuming low energy.

## Overview

### High-Performance Industrial Lighting

This 200W LED high bay light is engineered for demanding industrial and commercial environments, providing efficient and uniform illumination. It utilizes advanced phase change technology for superior thermal management, ensuring the heat transmission speed is 50 times faster than pure aluminum. With a robust, integrated design, this fixture offers exceptional durability and easy installation for warehouses, factories, and large indoor spaces.

## Performance Metrics

### Power Consumption

**200 W**

Power

**28000 lm**

Lumen Output

### Light Quality

- Color Temperature: 5000K
- CRI: >80
- Beam Angle: 120 degrees

## Technical Specifications

### Build Quality

- Housing Material: Aluminum
- IP Rating: IP65
- Lifespan: 50,000 hours

### Electrical Input

100-277VAC

## Compliance and Standards

### Certifications

UL, DLC

## Key Features

### Thermal Technology

Phase Change Technology • Integrated Heat Sink • Non-contact Heat Resistance
