

20A 1-Phase HVAC Definite Purpose Contactor

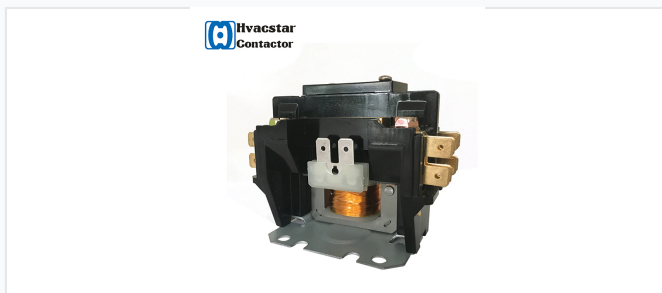

This 20A 1-phase contactor is designed for HVAC applications. It is suitable for definite purpose applications within HVAC&R systems.

ADDITIONAL IMAGES

Overview

Electronic AC contactor designed for HVAC and refrigeration control.

Compact design suitable for various HVAC&R systems.

Reliable HVAC Switching

This 1-phase definite purpose contactor is engineered for demanding HVAC and refrigeration applications. Featuring premium silver alloy contacts and shock-resistant actuator arms, it provides consistent performance and long service life. The unit is housed in a durable molded plastic casing and includes industry-standard mounting plates for simplified installation in existing systems.

Electrical Ratings

Performance Metrics

20 A AC-1 Rating (277V)	15 A AC-3 Rating (277V)	100000 cycles Mechanical Cycles
Coil Voltage	24VAC (50/60Hz)	
Current Rating	20 A	

Technical Specifications

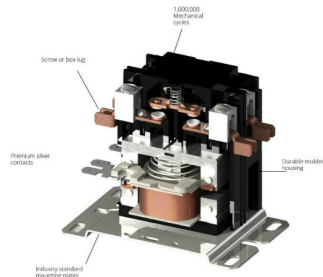

Tightening Torque

Connection Type	Torque
Screws	22 in-lbs
Lugs	40 in-lbs

Standards & Certifications

IEC60947-4-1, UL Certified

Features

Durable molded housing with industry-standard mounting plates.

Key Features

- Premium silver alloy contacts
- Shock-resistant actuator arms
- Durable molded plastic housing
- Industry standard mounting plates
- Compact, easy-to-install design
