

20kV/24kV Metal-Clad Withdrawable Switchgear

This metal-clad withdrawable switchgear is designed for 20kV and 24kV power distribution systems. Its modular design allows for flexible configuration and easy maintenance.

Product Overview

HKA Series Switchgear

The HKA series is a metal-clad withdrawable switchgear engineered for 20kV and 24kV power distribution systems. Featuring a modular design, it offers flexible configuration and simplifies maintenance procedures for industrial and commercial environments. Equipped with advanced protection and control devices, this system ensures safe and reliable operation while complying with international standards for indoor power distribution.

Technical Specifications

Rated Voltage

20 kV

Rated Voltage

24 kV
