

20kW Diesel Generator Set

This 20kW diesel generator set provides a reliable power solution for various applications. It features a heavy-duty diesel engine and a high-efficiency alternator for stable and consistent power output.

Overview

Reliable Power Generation

This 20kW diesel generator set is engineered for consistent and dependable power delivery in demanding environments. Designed with versatility in mind, it supports multiple configuration options including open, soundproof, and containerized formats to suit diverse industrial and remote power needs. With integrated advanced control systems and robust cooling, it ensures stable operation and longevity for critical backup or primary power applications.
