Overview

Reliable Power Solution

This 20kW silent diesel generator set is engineered for consistent, reliable power output in demanding environments. Designed with a soundproof canopy, it ensures quiet operation suitable for noise-sensitive locations while maintaining robust performance. The unit comes fully equipped with advanced control systems and comprehensive safety protections, making it an ideal choice for backup power, construction sites, and industrial applications.

Performance Metrics

Continuous Power Output

20 kW

Power Output

Frequency

60Hz

Technical Features

Core Features

- Silent operation canopy
- Automatic Voltage Regulation (AVR)
- Overload protection
- Low oil shutdown system
- Integrated control panel

Safety & Compliance

Overload Protection, Low Oil Shutdown, AVR Equipped

Applications

Recommended Use

Backup Power • Construction Sites • Industrial Use • Remote Locations
