

20V Cordless 5-inch Angle Grinder with Brushless Motor

This 20V cordless angle grinder is designed for cutting, grinding, and polishing. The brushless motor delivers enhanced performance and extended runtime.

Overview

High-Performance Cordless Grinding

This 20V cordless angle grinder features a high-efficiency brushless motor designed for long life, high endurance, and low noise operation. Engineered for professional use, it includes advanced safety features such as overload and rotation-blocking protection, alongside a soft start and brake function. The tool is built with an aluminum alloy gear housing and a dust-proof structure to ensure durability in demanding work environments.

Technical Specifications

Motor Type	Brushless
Disc Diameter	5 inch
Nominal Voltage	18 V
Maximum Initial Voltage	20 V

Features & Safety

Design Highlights

- 360° angle adjustment design
- Aluminum alloy gear housing
- Dust-proof motor structure
- Removable dust-proof net cover
- Battery capacity indicator

Safety Protections

Overload Protection, Rotation-blocking Protection, Short Circuit Protection, Soft Start, Brake Function
