Overview

Professional Cordless Sanding Performance

The 20V Cordless Orbital Sander is a versatile power tool engineered for efficient surface preparation across various materials. Featuring a variable speed control, it allows operators to precisely match sanding intensity to specific applications, from heavy material removal to fine finishing. Its cordless architecture offers unrestricted mobility for use in workshops, construction sites, and on-site DIY projects, while the integrated dust collection system maintains a cleaner work environment.

Technical Specifications

Power Source	20V Lithium-Ion Battery
Speed Control	Variable speed dial
Fastening System	Hook-and-loop

Key Features

Best For

- Woodworking
- Surface preparation
- DIY projects
- Construction site use

Key Capabilities

Variable Speed, Cordless Operation, Dust Collection, Ergonomic Grip
