Overview

Professional Surface Finishing Solution

This 20V cordless wax polisher is engineered to provide efficient and versatile surface finishing for automotive detailing, furniture maintenance, and professional workshops. Its cordless design offers complete freedom of movement, eliminating the constraints of power cables while maintaining consistent performance. Designed with ergonomics in mind, the tool ensures comfortable handling and precise control for high-quality application results.

Technical Specifications

Power Source	20V Battery
Operation Type	Cordless

Features

Key Features

- Cordless mobility for unrestricted use
- Ergonomic handle design for operator comfort
- High-performance 20V power system
- Suitable for automotive and furniture finishing

Applications

Recommended Applications	Automotive Detailing, Furniture Polishing, Surface Finishing, Wax Application
