

20V Max Cordless Circular Saw with Brushless Motor

This 20V max cordless circular saw features a brushless motor, providing enhanced power and efficiency. It is equipped with a 165mm blade and comes with a durable BMC for convenient storage and transportation.

Overview

Professional Cordless Performance

This 20V Max cordless circular saw is engineered for professional cutting tasks, featuring a high-efficiency brushless motor that ensures long life, low noise, and high endurance. Designed with user safety and convenience in mind, it includes an electric brake, soft start functionality, and a built-in LED light for precision work in low-light environments. The tool is constructed with a durable aluminum alloy upper guard, making it a robust choice for demanding construction and woodworking applications.

Technical Specifications

Motor Technology	Brushless
Maximum Initial Voltage	20 V
Nominal Voltage	18 V

Key Features

Operational Features

- Built-in LED work light
- Battery capacity indicator
- High torque mode prompt
- Aluminum alloy upper guard

Safety & Control

Electric Brake, Soft Start, Short Circuit Protection
