

2.1 Channel Speaker System with Subwoofer

This compact 2.1 channel speaker system includes a central subwoofer and two satellite speakers. It is designed for use with computers, gaming consoles, and other audio devices.

Product Overview

High-Performance 2.1 Channel Audio

This compact 2.1 channel speaker system delivers a balanced audio experience featuring a dedicated subwoofer and two satellite speakers. It is engineered for clear mid and high-range frequencies while utilizing a bass reflex port for enhanced low-frequency impact. Designed for versatility, the system integrates seamlessly with computers, gaming consoles, and various other audio playback devices.
