Overview

The 2104B tractor is designed for heavy-duty agricultural applications like plowing and tilling.

High-Efficiency Farm Tractor

This 155 kW agricultural tractor is engineered for high economic efficiency and low fuel consumption. It features a robust 6-cylinder water-cooled engine and a versatile F16+R18 shuttle shift transmission system. Designed for demanding field operations, it includes a heavy-duty LUK independent dry clutch and a high-capacity 270L fuel tank for extended working hours.
