

210mm Miter Saw

This miter saw operates at 110V-240V, 50-60 Hz, with an input power of 1500W/8.5A. It features a 210mm grinding disc diameter and a no-load speed of 5000r/min at 110V-120V or 4500r/min at 220V-240V.

Product Overview

Precision Cutting Performance

The 210mm Miter Saw (Model J1G-ZP8-210A) is a specialized tool engineered for high-accuracy crosscuts and miter cuts. Featuring a robust design with a pivoting arm and circular saw blade, it provides the stability required for demanding woodworking, construction, and metalworking tasks. This model is built to deliver efficiency and consistent precision when cutting materials to specific lengths and angles.

Technical Specifications

Blade Diameter	210 mm
Model Identifier	J1G-ZP8-210A

Applications

Primary Applications	Woodworking, Construction, Metalworking, Framing, Trim Work
----------------------	-------------------------------------------------------------

Key Features

Core Capabilities

- Accurate crosscuts
- Miter angle adjustments
- Pivoting arm mechanism
- Precision length cutting
