

212L Capacity Top-Freezer Refrigerator

This refrigerator features a total effective volume of 212L and an 89L freezer compartment. It consumes less than or equal to 0.75kw.h/24 of electricity and has a freezing capacity of 4.5kg/24h.

Overview

Efficiency Meets Performance

This 212L top-freezer refrigerator is engineered for reliable cold storage, offering an optimized balance between capacity and power consumption. Designed for professional utility, it features a dedicated 89L freezer compartment and high-efficiency cooling capabilities. With its compact footprint and stable climate performance, this unit is an excellent solution for professional environments requiring dependable refrigeration.
