

220kV Power Transmission Line Project

This is a contracted project for a 220kV power transmission line. It connects the Shweli one hydropower station to the Dagon Hill nickel mine.

Project Overview

220kV Transmission Infrastructure

This project encompasses the design and implementation of a 220kV power transmission line connecting the Shweli One hydropower station to the Dagon Hill nickel mine in Myanmar. It represents a critical infrastructure development designed to facilitate reliable energy transport for industrial operations. The project focuses on high-voltage transmission capabilities to support large-scale energy requirements.

Technical Specifications

Voltage Rating	220 kV
Application	Hydropower Transmission, Industrial Power Supply, High Voltage

Location Context

Key Connection Points

- Shweli One Hydropower Station
- Dagon Hill Nickel Mine

Region	Myanmar
--------	---------
