

220V AC Electromechanical Timer Switch

This 220V AC electromechanical timer switch automates the control of electrical circuits based on user-defined time intervals. Featuring a rotating dial, it allows for fine-grained adjustments of on/off times.

Product Overview

Professional Timing Control

The 220V AC electromechanical timer switch (Model TB-17) is a reliable solution for automated electrical circuit management. Designed for precision, it utilizes a physical rotating dial that allows users to configure specific on and off schedules. This robust component is highly suitable for industrial or residential applications, including lighting, HVAC systems, and various electrical appliances requiring time-based operation.

Technical Specifications

Rated Voltage	220 V AC
Model Identifier	TB-17
Control Mechanism	Electromechanical

Applications

Suitable Applications

- Lighting Systems
- HVAC Equipment
- Electrical Appliances
- Industrial Automation
