

22AWG High-Definition Multimedia Interface Cable

High-definition multimedia interface cable with 22AWG conductors for high-speed data transmission. It is designed to connect high-definition audio and video devices with optimal signal integrity.

Product Overview

High-Performance Multimedia Connectivity

This high-definition multimedia interface cable is engineered with 22AWG conductors to ensure superior signal integrity and high-speed data transmission. Designed for professional audio and video applications, it features robust shielding to minimize interference and maintain signal quality. The cable is available in distinct jacket colors, including yellow and black, making it a reliable choice for connecting high-definition devices.

Technical Specifications

Design Features

- High-speed data transmission
- Shielded to minimize interference
- Gold accents
- Individually insulated wires

Conductor Gauge	22AWG
Available Jacket Colors	Yellow, Black

Applications

Primary Use Cases

High-definition audio • High-definition video • Device connectivity
