Product Overview

Reliable Portable Power Solution

The BS2500 is a robust 2.2kW gasoline generator engineered for versatile power needs in remote locations or during outages. Featuring a 212cc OHV engine and a durable protective frame, it offers a stable power supply for tools and appliances. With integrated safety features like an Automatic Voltage Regulator (AVR) and low oil protection, this unit ensures reliable performance for both home and professional applications.

Performance Metrics

Key Performance Indicators

2.2 kW

Maximum Power

212 cc

Displacement

15 L

Fuel Tank

Engine Specifications

| | |
|----------------------|---|
| Engine Configuration | Single cylinder, four stroke, forced air cooling, OHV |
| Rated Speed | 3000-3600 rpm |
| Oil Capacity | 0.6 L |
| Starting System | Recoil, E-start |

Electrical Output

Output Parameters

| Parameter | Value |
|--------------------|-----------------------------------|
| Rated Voltage | 110/220V |
| Rated Current | 9A |
| Frequency | 50/60HZ |
| Voltage Regulation | AVR (Automatic Voltage Regulator) |

Physical Characteristics

| | |
|--------------------|--------------------|
| Dimensions (L*W*H) | 605 x 450 x 470 mm |
| Weight (NW/GW) | 40 / 41 kg |

Safety & Compliance

Certifications

CE • Euro-V

Safety Systems

- Circuit Breaker Protection
- Low Oil Alert Indicator
- Ground Connection Terminal
- Automatic Voltage Regulator (AVR)

Logistics

| | |
|----------------------------|-------------------------------------|
| Container Loading Quantity | 230 units (20GP) / 485 units (40HQ) |
|----------------------------|-------------------------------------|
