

22mm 3-Position Selector Switch with Indicator Light

This 22mm selector switch features a 3-position configuration and an integrated indicator light. It is designed for industrial control applications, offering reliable operation and clear visual indication.

Product Overview

Industrial 3-Position Selector Switch

The XDL32-CKJ3365 is a high-performance 22mm selector switch featuring a 3-position stay-put mechanism and an integrated indicator light. Designed for industrial control circuits, this unit is built with a durable zinc alloy and flame-retardant plastic housing, utilizing silver alloy contacts for excellent anti-electrical erosion properties. It is fully compliant with international safety standards including IEC60947-5-1, making it a reliable solution for machinery control and signaling applications.

Technical diagram illustrating mounting dimensions and available color-coded models.

Protection Grade

IP65 • IP66 • IP67 • IP68

Rated Insulation Voltage

600 V

Mounting Hole Diameter

22 mm

Pollution Grade

3

Operational Parameters

Mechanical Life

3000000 ops

Push Button Cycles

Operating Temperature Range

-5°C to +55°C

Relative Humidity

35% to 85% RH

Compliance and Standards

International Certifications

CE, ISO 9001, RoHS, UL, IEC 60947-5-1
