

230kV Overhead Power Line Construction Project

Turnkey project for the construction of a 230kV overhead power line. This project includes comprehensive services from design and procurement to installation and commissioning.

Project Overview

Turnkey Infrastructure Solution

This project represents a comprehensive 100KM turnkey solution for 230kV overhead power line construction. Successfully executed in 2008, the scope encompassed the full lifecycle of the infrastructure development, including design, procurement, installation, and final commissioning. It demonstrates proven capabilities in large-scale international power transmission projects.

Technical Specifications

Voltage Rating

230 kV

Voltage

Total Line Length

100 KM

Project Details

Scope of Work

- Design
- Procurement
- Installation
- Commissioning

Project Location

Bangladesh

Completion Year

2008
