Product Overview

Professional Grade Cutting Performance

These 230mm stainless steel cutting discs are engineered for high-precision, clean, and burr-free cutting. Featuring high tensile fiberglass reinforcement, these discs ensure maximum safety during demanding industrial applications. The design minimizes friction and heat generation, effectively preventing thermal damage to the workpiece while maintaining fast cutting speeds.

Technical Specifications

Performance Metrics

80 m/s

Max Operating Speed

6650 RPM

Max R.P.M

Available Grit Sizes

- 24#
- 30#
- 46#
- 60#

Material Purity

Iron, sulphur, and chlorine content less than 0.1%

Certifications & Compliance

Certifications

MPA EN12413, ISO 9001, ISO 14001, OHSAS 18001

Product Details

Construction Materials

- Aluminum oxide abrasive
- Reinforced fiberglass net
- Resin (liquid and powder)
- Metal ring

HS Code

68042210
