

230mm Ultra-Thin Cutting Disc for Stainless Steel

This 230mm cutting disc is designed for high-efficiency and safe operation. It is manufactured with premium abrasives and reinforced for durability, ensuring clean and precise cuts on stainless steel.

ADDITIONAL IMAGES

Overview

High-Performance Cutting Solution

This 230mm ultra-thin cutting disc is engineered specifically for professional applications involving stainless steel (INOX). It delivers high working efficiency and fast, clean cuts with minimal material waste and reduced heat generation. Designed for durability and safety, it is an ideal choice for metalworkers and fabricators requiring precision in demanding environments.

Technical Specifications

Dimensions

Diameter	Thickness	Bore Size
230 mm (9")	2.0 mm (1/12")	22.2 mm (7/8")

Specification Code

WA46TBF

Performance

Operating Speed

6640 RPM

Max RPM

80 m/s

Max Velocity

Key Performance Features

- High working efficiency
- Ultra-thin design for precise cutting
- Minimal material loss
- Reinforced for safety and durability
- Reduced heat generation during use

Application

Compatible Materials

Stainless Steel, INOX, Edelstahl Stahl, Inox Acero

Compliance & Safety

Safety Standards

EN12413 • ISO • MPA
