

230V Power Cutter with Adjustable Cutting Angle

This power cutter features an 800W motor and IP54 protection rating. It is designed for making precise 45° and 90° cuts with an adjustable cutting angle from 0° to 45°.

Overview

Professional Power Cutting Performance

This 230V power cutter is engineered for precision and reliability in demanding work environments. Featuring a robust 800W motor and an IP54 protection rating, it ensures consistent operation and durability. With an adjustable cutting angle from 0° to 45°, it provides the versatility needed for both 45° and 90° cuts, making it an essential tool for professional construction and fabrication tasks.

Technical Specifications

Rated Power

800 W

Motor Power

2950 min-1

Operating Speed

IP Rating

IP54

Electrical Requirements

230V~/50Hz

Cutting Capabilities

Performance Metrics

Metric	Value
Max Cutting Depth	50mm
Blade Thickness	30mm
Blade Diameter	φ230/φ25.4mm

Cutting Angles

0°, 45°, 90°

Physical Dimensions

Tool Dimensions

880 x 382 x 590mm

Weight

40kg (Net) / 43kg (Gross)
