Overview

High-Voltage Miniature Power Solution

This 23A super alkaline battery provides a reliable 12V power supply designed for high-performance in small electronic devices. It features a long-lasting chemistry that ensures consistent power delivery and an extended shelf life for critical applications. Ideal for professional and consumer electronics, it offers a dependable energy source in a compact cylindrical form factor.

Technical Specifications

Voltage Rating

12 V

Nominal Voltage

Battery Type	Super Alkaline (Manganese Dioxide / Zinc)
Form Factor	23A Miniature Cylindrical
Rechargeable	No

Applications

Common Applications

- Doorbells
- Lighters
- Security door remote controls
- Car key fobs
- Garage door openers
- Car alarms

Compliance & Quality

Quality Assurance

Quality Management Certified • Environmental Responsibility • CE Compliant

Certifications & Standards

ISO 9001, ISO 14001, SGS CE
