

24-inch Electric Bicycle with 36V Lithium-ion Battery

This electric bicycle features a 36V motor and a 36V/10AH lithium-ion battery, providing a range of 35-40km. The bicycle has a power output of 180W and a 24-inch frame.

Overview

Efficient Urban Mobility

This 24-inch electric bicycle is designed for reliable urban commuting and short-distance travel. Powered by a 36V lithium-ion battery system, it offers a practical range of 35-40km on a single charge. With a lightweight yet sturdy build, it provides a balanced solution for daily transportation needs.

Performance

Motor Power	180 W
System Voltage	36 V
Estimated Range	35-40 km

Battery

Battery Chemistry	Lithium-ion
Capacity	10 AH

Physical Specifications

Wheel Size	24 inch
Gross Weight	25 kg
Dimensions	1500 x 220 x 600 cm

Key Metrics

Performance Highlights

180 W Power Output	25 kg Gross Weight
