

24-Inch High-Velocity Drum Fan

This high-velocity drum fan is designed for industrial and commercial applications requiring powerful airflow. The 24-inch fan features a durable steel housing with adjustable tilt and a wheeled cart for portability.

Overview

Industrial Performance

The 24-inch high-velocity drum fan is engineered for demanding industrial and commercial environments where robust airflow is critical. Featuring a durable powder-coated steel housing and a heavy-duty motor, this unit ensures reliable operation in warehouses, factories, and construction sites. Its portable design, complete with locking casters and adjustable tilt, allows for precise positioning to optimize ventilation and cooling efficiency.

Technical Specifications

Safety Compliance

Grounded power cord

Fan Diameter	24 inches
Housing Finish	Powder-coated steel
Mobility Features	Wheeled cart, Locking casters, Adjustable tilt
