Overview

Professional Grade Cutting Power

These 24-inch insulated bolt cutters are engineered for heavy-duty industrial and construction applications. Featuring hardened alloy steel jaws, they provide exceptional durability and maximum cutting force for bolts, chains, threaded rods, and wire. The integrated compound lever action significantly reduces user effort, while the insulated handles ensure enhanced safety during operation.

Technical Specifications

Tool Length	24 in
Cutting Capabilities	Bolts, Chain, Threaded Rod, Wire
Jaw Material	Hardened Alloy Steel

Key Features

Performance Highlights

600 mm

Length

1 Compound Lever

Action Type

Safety & Design

- Insulated handles for user protection
- High-leverage design for reduced fatigue
- Durable construction for industrial use
