Product Overview

Energy-Efficient 24-Inch Solar LED Television

This 24-inch LED Solar TV is a high-definition entertainment solution designed specifically for energy efficiency and off-grid applications. Featuring an A-grade panel and integrated solar power options, it provides clear visuals while maintaining a low power consumption of just 8.5W in Eco mode. With a wide DC input range and versatile connectivity including HDMI and USB, it is an ideal choice for areas with limited access to traditional electricity.
