

24-Port 10/100Mbps Ethernet Switch

This unmanaged switch is designed for small to medium-sized networks. It provides twenty-four 10/100Mbps auto-negotiation RJ45 ports for expanding network capacity with reliable data transfer due to its support for IEEE 802.3x flow control.

Overview

High-Performance Networking

The 24-Port 10/100Mbps Ethernet Switch is an efficient, unmanaged solution designed for seamless network expansion in small to medium-sized environments. Featuring a plug-and-play architecture, it requires no complex configuration, allowing for rapid deployment. The device ensures reliable, stable data transfer through advanced flow control support and a durable metal chassis.

Technical Specifications

Number of Ports	24
Port Type	10/100Mbps Auto-negotiation RJ45
Flow Control	IEEE 802.3x (Full-Duplex), Backpressure (Half-Duplex)

Physical Attributes

Installation

Rack-mountable • Plug-and-play

Case Material	Metal
