

# 24 Port Angled Patch Panel

This 24-port patch panel is made from SPCC cold rolled steel with electrostatic spraying. It features a rotatable bracket with a pull structure and includes a cable bracket that can be equipped with a cable fixing card holder.

## Overview

### High-Efficiency 24-Port Angled Patch Panel

This 24-port angled patch panel is engineered for professional network installations, featuring a design that significantly reduces cable clutter and optimizes airflow within server racks. Constructed from high-quality cold-rolled steel and ABS plastic meeting UL94V-0 standards, it ensures long-lasting performance and fire safety. The angled configuration facilitates easier cable management and identification, making it an ideal choice for high-density Cat5e, Cat6, and Cat6a cabling environments.

## Technical Specifications

### Port Count

**24 Ports**

Total Ports

### Cabling Compatibility

Cat5e, Cat6, Cat6a, RJ45

## Material Construction

### Plastic Fire Rating

UL94V-0

### Main Plate Material

High quality cold rolled plate

### Grounding Component

Stainless steel (shielded)

## Environmental Parameters

### Operating Temperature

-10°C to 60°C

### Storage Temperature

-40°C to 68°C

### Relative Humidity

10% ~ 90%

## Design Features

### Key Design Benefits

- Angled design for improved cable management
- Enhanced airflow for rack cooling
- Standard rack-mountable form factor
- Integrated labeling system for port identification
- Durable metal construction
