

24-Port Fast Ethernet Switch with 2 Gigabit Ports

This switch features 24 10/100Mbps ports and 2 Gigabit ports. It is designed to provide high-speed network connectivity for small to medium-sized businesses looking to expand their network infrastructure.

Overview

High-Performance Networking Solution

This 24-Port Fast Ethernet Switch is designed to meet the connectivity demands of small to medium-sized business environments. Featuring 24 10/100Mbps ports and 2 dedicated Gigabit ports, it provides a reliable foundation for expanding local network infrastructure. Its efficient design ensures high-speed data transmission and seamless integration into professional setups.

Technical Specifications

Port Configuration

24 Ports

Fast Ethernet Ports

2 Ports

Gigabit Uplink Ports

Total Port Count

26

Supported Speeds

10 Mbps, 100 Mbps, 1000 Mbps

Features

Status Indicators

- Power Indicator
- Link/Activity Indicators per port

Application

SMB Networks • Infrastructure Expansion • Data Routing
