

24-Port FTP Cat.5e Patch Panel

This FTP Cat.5e patch panel provides 24 shielded ports for reliable network connections. Designed for standard 19-inch rack mounting, it supports high-speed data transmission and reduces electromagnetic interference.

Product Overview

High-Performance Network Connectivity

This 24-port FTP Cat.5e patch panel is engineered for reliable data transmission in professional network environments. Featuring shielded ports, it effectively minimizes electromagnetic interference to ensure signal integrity. Designed for standard 19-inch racks, it is a robust solution for structured cabling systems in offices and data centers.

Technical Specifications

Category

Cat.5e

Number of Ports

24

Shielding

FTP (Foiled Twisted Pair)

Installation

Rack Size

19-inch

Performance Metrics

Key Benefits

- Electromagnetic interference reduction
- High-speed data transmission support
- Optimized for structured cabling
